Education

Purdue University Aug 2023 – May 2027
BS in Industrial Engineering, Minor in Economics West Lafayette, IN

Certifications: Applications of Data Science (Purdue University,) Lean Six Sigma Green Belt (IISE)
Coursework: Intermediate Macroeconomics, Game Theory, Probability and Statistics I/II, Operations Research

Experience and Involvement

Incoming Data Analytics Intern (Airport Performance) Incoming May 2026
American Airlines Fort Worth, TX

Industrial Engineering Intern (Transformation and Process Optimization) July 2025 – Present
United Airlines Newark, NJ

- Analyzed biometric departure performance—reviewing **5M+ scans across 12,500 flights** at the **5th-busiest U.S. international airport**; built a manager-focused Palantir Foundry dashboard for agent-level tracking aligned to Biometric Exit requirements, driving a **10% performance improvement in two weeks**.
- Leading an analytical study on **late-call cabin maintenance delays** by leveraging operational data to examine trends in issue detection and turnaround timing in a **cross-functional effort**, driving **preventative check enhancements and SOP refinements**.
- Migrating training and liability tracking systems for Analytics department **(200 employees)** from Spotfire to Power BI with Amazon Redshift backend, streamlining internal reporting.

Undergraduate Research Assistant January 2025 – Present
Purdue University College of Liberal Arts West Lafayette, IN

- Automated preprocessing and semantic embedding pipeline using Sentence Transformers to cluster **10,000+** Congressional staff taskings, reducing manual workload previously requiring months of effort to minutes.
- Implemented Python scripts to parse, transform, and analyze structured CSV/JSON datasets **(10M+ entries)**, generating visualizations and statistical insights for political donation trends under two-round election systems.

Board Member/Acting V.P. External July 2024 – May 2025
Purdue Filipino Association West Lafayette, IN

- Managed external relations for a social club of **80+ members**, fostering interclub collaborations, organizing fundraisers ($2K+ per session), and planning **intercollegiate conferences.**
- Served as **Acting VP External** due to vacancy, personally overseeing logistics and outreach for multi-club events and external partnerships throughout a semester.

Projects

Full-Stack ERP/CRM System Academic Project, 2025

- Developed full-stack ERP/CRM application using **PHP**, **MySQL**, and **HTML/CSS/JavaScript**, simulating role-based workflows for customer, product, and order lifecycle management for **200+ orders and 30+ simulated users**.
- Designed interactive dashboards supporting real-time CRUD operations, SQL joins, server-side validation, and auth-restricted views across 8-table schema.

WiFi-enabled Transit and Weather Clock Personal Project, 2024

- Built a Raspberry Pi–powered dashboard integrating live transit APIs, weather data, and an LED matrix display for real-time commuter information, using **Raspberry Pi, Python, and GTFS-RT.**

Skills

Languages: Python, C, R, PHP, JavaScript, HTML, CSS, SQL

Technologies: scikit-learn, SBERT, Git, Amazon Redshift, MATLAB, Palantir Foundry, Power BI, Spotfire
