Jino Nicolas

San Francisco Bay Area • nicolasj (at) purdue (dot) edu

Education

PURDUE UNIVERSITY West Lafayette, IN

Bachelor of Science in Industrial Engineering; Minor in Economics; Cert. in Data Sci. Applications May 2027

Involvement: Purdue Filipino Association, Purdue Space Program - Active Controls, Five Dynamics

Relevant coursework: Probability and Statistics in Engineering, Intermediate Macroeconomics, Programming with C, Linear Algebra, Python for Data Science, Operations Research

Experience

HEAD LIFEGUARD Dublin, CA

The Wave Waterpark and Aquatic Center May 2021 - August 2024

- Supervised daily operations of waterpark that attracted over **1000** visitors daily.
- Designed and implemented training and testing curriculums to maintain proficiency of **40+** employees in advanced first aid techniques.
- Created daily lifeguard schedules, optimizing coverage and reducing park cleanup times by **50%.**
- Directly handled guest relations as a primary point of contact, ensuring swift resolution and maintaining guest satisfaction.

Involvement

PURDUE FILIPINO ASSOCIATION

External Committee/Acting Vice President External

- Managed external relations for a social club of **80+** members, fostering interclub collaborations and promoting joint participation in shared events.
- Organized and volunteered for community outreach programs and fundraisers, netting upwards of **$2000** per fundraising session.
- Planned and led trips to **intercollegiate conferences**, ensuring seamless logistics and meaningful engagement for attendees.
- Served as Acting Vice President External, temporarily overseeing external operations, coordinating events with other schools, and ensuring the success of ongoing collaborations.

FIVE DYNAMICS

Operations Director

- Organized and incorporated an interdisciplinary engineering club of **20+** members focused on designing and constructing affordable, scalable solid rocket motor systems.

PURDUE SPACE PROGRAM - ACTIVE CONTROLS

Manufacturing Subteam

- Programmed advanced five-axis CNC mills and lathes to precisely manufacture high-performance aluminum and steel components for aerospace applications.

Projects

TRANSIT + WEATHER CLOCK September 2024

- Designed and 3D-modeled components in **Fusion 360** for a custom clock for students, including an internal mount, display frame, and chassis.
- Programmed the clock's functionality using **Python** to display localized real-time weather and transit data via API calls.
- Wired and assembled the clock, integrating a dot matrix display for data output.
- Utilized a **Git** source control system to allow for development on multiple devices.

Additional

Technical Skills: Proficient in MATLAB, Inventor/Fusion 360, Python, scikit-learn, C, R, Lean Six Sigma Green Belt
Language Skills: Proficient in Filipino (Tagalog,) Basic in Chinese (Mandarin)
